PICTORIAL HISTORY

THE UNITED STATES,

FROM the discovery of America by the Northmen to the present time.—By John Front, Professor of Belles Lettres of the High School of Philadelphia.—Embellished by upwards of three hundred original cuts, designed by Croome expressly for this work.—Now in progress of publication, and to be completed in twenty monthly numbers, at the unparalleled low price of twenty-five cents each; the whole forming four octave volumes.

A full and scales with History of the United States for

whole forming four octave volumes.

A full and copious History of the United States for families and libraries, has long been called for by the American people: the publisher has now the picasure and satisfaction of presenting to the public such a work. It is the result of years of study and research by one of our ablest writers; and in order that the noble deeds and striking scenes connected with our history may be properly depicted, the publisher has engaged the services of a superior and distinguished artist.

In carrying and this contents.

In carrying out this undertaking, a great investment of carrying out this undertaking, a great investment of capital has been required, and much mechanical skill employed to render it a work worthy of the ad-miration of every lover of his country; and one to which every patriot may point as an evidence of the great degree of perfection and refinement our liberal institutions have secured us.

The first number appears this day, (April 1st); the succeeding ones will appear promptly on the first of each month until the whole is perfected. At the con clusion of each volume, a complete index and title page will be furnished.

clusion of each volume, a complete index and title gage will be furnished.

The publisher pledges himself that the embellishments in the whole work shall exceed three hundred, and equal those in the first or specimen number in style and execution. The distribution of the pictures will of course be regulated by the subject, some chapters being much more susceptible of rich pictorial embellishments than others. The succeeding parts will contain the same number of pages as this. Persons at a distance, who are desirous of obtaining this work direct from the publisher, will please remit five dollars, tree of expense of postage, (Postmasters' franks can always be obtained for remittances for periodicals,) and the whole will be sent.—Clubs, by a remittance of ten dollars, will receive three copies, by a remittance of fitteen, five copies. Postage of each number, under an hundred miles, four and one-half cents.

Individuals desirous of acting as agents for this work, are advised to make application.

MAT ILL be published, in the City of Washington,

W ILL be published, in the City of Washington, by the 20th of April, the first number of the weekly

"GERMAN NATIONAL GAZETTE," a newspaper devoted to the political, social, and literary interests of the day. Terms: Per annum §2 00, strictly in advance. A number of correspondents in Europe, amongst them some of the ablest German writers of the day, are engaged for the paper, which will also contain English articles.

In connection with the above is published the

"GERMAN IN AMERICA,"

monthly

"GERMAN IN AMERICA."
of mammoth size, now the largest paper in the Union. The eighth number will be issued on the 1st of May. Terms: \$1.50 per annum, in advance. Both papers sent to one address for \$3.00, in advance.

The "German in America" is a paper principally of a literary character, and intended to be an interpreting medium between the literary genius of the Saxon and Anglo-Saxon race. It will exhibit some of the best literary product ons, especially poetical, in each language, with parallel versions in the other. To those therefore of the English-American public, who are studying the German language, or wish to become familiar with German literature, this paper is strongly recommended. It contains a complete list of all books, periodicals, etc., published in Germany. Business men who deal, or wish to deal, with the American population of the German tongue, will find it greatly to their advantage to advertis: in this paper. It has already sequired a circulation which extends over the whole Union, the contiguous South, Canada, and Germany, and by far exceeds that of any other German paper in the Union—its tendency being not of a local, but of a universal character. Besides this, the rates of advertising in both papers are exceedingly low, so as to enable every body to advertise who can be profited by it.

In Publishers will oblige by early communicating copies of new publica ions which will be critically noticed. We intend to furnish the German public here, and on the other side of the Atlantie, with a complete review of all productions of the American press worthy of notice.

The printing must be executed with new and perfect type, and on the best paper used for the different descriptions of printing required. The articles and work will be required from time to time as they are wanted; and they will be paid for quarterly; a failure to furnish the articles; or to execute the work in every particular, as required by the contracts, and within a reasonable time, of all which the head of the Department will be the final judge, will cause a forfeiture of the contracts.

The classes, character, and descriptions of the articles and work are designated, as nearly as can now be ascertained, in the subjoined lists, with which the projosals must, in form, precisely corre-pond. There must be but one price specified in the proposals for each article; and any thing not embraced in the lists, which may be needed, the contracts will be made to require at corresponding rates with those specified. The proposals must be sealed, endorsed "Proposals for Furnishing ——," and directed to the Secretary of the Treasury,

A bond, with sufficient sureties to the satisfaction of the Secretary of the Treasury, will be required for the fulfilment of any contract which may be entered into.

CONSUMPTION CANNOT BE CURED!

Those who say it can are imposters and quacks. Still it may be prevented or its progress stayed, by using Dr. Peters' Cough Lozenges. Begin in season. Do not neglect a slight cough until consumption has commenced its ravages. A delay of a few days of ten prove fatal. Price 25 cents per box. Peters' Cough Lozenges have performed some of the most remarkable cures on record. One trial of them is more satisfactory than a column of certificates.

Peters' Medicated Lozenges are the most valuable discovery of the 19th century. They are entirely pleasant to the taste, and more efficient than any other medicine. These Lozenges are the result of long continued and patient investigati u and experiment, conducted in concert by some of the most distinguished physicians in the Union, who believing that some of the best known remedies might be prepared in a palatable form, have directed their labors to that end, till they have produced preparations in the popul r form of Lozenges for nearly every disease incident to the numan system.

this estimated that, in the United States, 100,000 children die yearly from the effect of worms alone. This wast mortality can be almost entirely prevented by the use of Peters' celebrated Lozenges. Thousands and tens of thousands pine away and die without suspecting the real disease. The following are a few of the symptoms: headache, pale lips, flushed cheeks, disturbed dreams, feverishness, thirst, bad taste in the mouth, offensive breath, itching of the nostrils, pain in the stomach, nausea, unnatural and the stomach and the s

E_Mrs. Catharine Ann Briggs, Cherry street, Philadelphia, has a little daughter who had been in a decline for several years. At times she would eat voraciously, and sometimes eat nothing at all; and she was fast wasting away. Her symptoms were so unusual and e-stradictory that the doctors knew not what to do; but do what they would she continually grew worse, and refuctantly they declared he must die. At the request of a friend, the mother at this stage procured a box of Peters' Worm Lozenges. The first dose satisfied all that worms was the cause of all the child's sufferings, and two boxes effected a perfect cure. perfect cure.

A MERICAN CROWN WINDOW GLASSou and State of New York.

of Clinton, and State of New York.

To the Redford Crown Glass has been awarded the first Premium of the American Institute in the city of New York for five successive years, and has received a gold medal in commendation of its superi-

or merits.

This Glass is made from white flint sand, obtained

in the vicinity of the works, and is the only Crown Glass made from that species of sand. It is capable of standing every change of climate, not will it lose ts lustre by age.
The Redford and Seranac Crown Window Glass

The Redford and Saranac Crown Window Glass are distinguished from ordinary Glass by the uncommon evenoess and beauty of surface, the superior transparency and lightness of color, the great thickness, and the general excellence of the materials which compose them. The surface and being polished after being blown, retains the enamel, brilliancy, and bardness, and is not subject to the objection so often applied to Plate Glass, ot being easily defaced and permanently bedinmed by dust; being made of extra thickness, will, without injury, withstand violent winds, half storms, jare of cannon, &c. Its use, in the end, will prove more economical, independent of its adding so much to the beautiful appearance of buildings.

in the end, will prove more economical, independent of its adding so much to the beautiful appearance of buildings.

Specimens of this deservedly popular Glass may be seen in the New York Exchange and Custom House, Howard's Hotel, Bronson's Buildings, Broadway, Centre Merket, and a great many private residences and stores in various parts of the city; also, in the Exchange and Custom House, Boston; Girard College, Philadelphia; Exchange Hotel, Baltimore; in the public buildings at Washington city; the Capitol at Raleigh, North Carolina, and in many both public and private edifices throughout the United States. It has been used in a great number of steamboats and railroad cars, and given entire satisfaction. It is be ieved that the above will suffice to prove that this Glass stands pre-eminent, and that it deservedly merits the approbation of builders and consumers of Glass.

The Saranac Crown Glass is most used in stores and buildings of the second order, green houses, &c. where strength and clearness are particularly desired, and will range about 334 per cent. cheaper than Redford. The double thickness is always used for lighthouses, and is taken by the trae economist for sky lights, steamboats, ships cabin windows, &c.

Ground Glass for sky lights, churches, and artists' windows, furnished to any pattern or size. The Glass is carefully packed in stout boxes, nailed, and secured so as to be transported with safe y to any part of the United States.

MISSOURI CURRENT-RIVER COPPER MINES SHANNON COUNTY, MISSOURL

WOULD now ask the attention of capitalists to these Copper Mines, rich in ore, yielding from 40 to 66 per cent. of copper, which, by a single process of smelting, is equal to the South American refined pig—so pronounced by Messrs McKim & Co., of Baltimore, to whom several shipments were made by the "Mine à la Motte Mining Company." Situated near the junction of Jack's Fork and the Current river, within half a mile of either stream, and near water-power for all manufacturing purposes, and under a susny clime, in the vicinity of agricultural lands equal to the best in Missouri; surrounded by hils bearing inexhaustible forests, and rising to mountains whetce flow pure and never-failing springs, forming navigation six months in the year,—Nature, with a profuse hand, seems to have omitted but few facilities for manufacturing, and transporting the product of the copper mines. Believing this property, of all the vast and fertile Mississippi valley, may be made the most safe and profitable investment of capital, I will propose a disposition of a portion, (by sale or otherwise,) on liberal terms by which to enlist the agreement. propose a disposition of a portion, (by sale

P. S. The above described mines, since the year 1837, have been held, in a measure, unproductive by conflicting claims. I first located confirmed Spanish grants on them, which James Whitcomb, then Comgrants on them, which James Whitcomb, then Commissioner, decided were not confirmed. I then acquired title under Mr. James Thompson, who held
by floating pre-emption right; when "Joseph Slater,
the agent out tool of an extensive company, proved
a pre-emption by Josias Berryman, one of said company; both of whom, base villains, are convicted, by
the facts, of bribery and perjury, on which alone
was based their fraudulent claim." Again my claim was based their fraudulent claim." Again my claim was set at naught by Whitcomb, who was successful in the viie attempt to stifle an investigation of the right of title, until he went out of office; since which time, and change of Commissioners, an investigation was had, and my titles confirmed. See report of Colonel T. J. Allen, register of the land office, and the decision of the Hon. Mr. Blake, Commissioner of the General Land Office, as published in the Globe November 7th, 1842: also, decision of the Hon. Mr. Forward, Secretary of the Treasury, confirming the Commissioner's decision.
